

BIBLIOGRAPHY OF THE PRAGUE SEMINAR ON FOUNDATIONS OF  
SET THEORY (1962-1967)

Petr Hájek

Papers in this bibliography are ordered chronologically by their year of appearance. Abbreviations:

ZfML - Zeitschrift für Mathematische Logik und Grundlagen der  
Mathematik

BAPS - Bulletin de l'Académie Polonaise des Sciences

CMUC - Commentationes Mathematicae Universitatis Carolinae  
(Prague)

CPPM - Časopis pro pěstování matematiky

I am not sure whether this bibliography is complete. The papers 16, 19, 20, 33, 21, 31, 46, 48 (in this order) form a series; a new reformulation is given in 49. Most authors of the papers listed here meet weekly at the seminar of Professor Vopěnka. All letters to them can be addressed c/o P. Vopěnka, Department of Mathematics, Charles University, Sokolovská 83, Prague, Czechoslovakia. Our group is very interested in an up-to-date exchange of information and reprints or preprints.

1. P. Vopěnka: Odin metod postroenia nestandartnoi modeli (in Russian) Doklady AN SSSR 143 (1962).
2. \_\_\_\_\_, Modeli teorii mnozhestv (Russian; German summary) ZfML 8 (1962), 281-292.
3. \_\_\_\_\_, Postroenie modelei teorii mnozhestv metodom ultraproizvedenia (Russian; German summary) ZfML 8 (1962), 293-304.

4. P. Vopěnka, Postroenie modelei teorii mnozhestv metodom spektra (Russian; German Summary) ZfML 9 (1963), 149-160.
5. \_\_\_\_\_, Elementarnye poniatia v teorii mnozhestv (Russian; German Summary) ZfML 9 (1963), 161-167.
6. \_\_\_\_\_, Postroenie nestandartnoi neregularnoi modeli teorii mnozhestv (Russian; German Summary) ZfML 9 (1963), 229-233.
7. P. Vopěnka - P. Hájek, Über die Gültigkeit des Fundierungsaxioms in speziellen Systemen der Mengenlehre ZfML 9 (1963), 235-241.
8. P. Hájek, Die durch die schwach inneren Relationen gegebenen Modelle der Mengenlehre, ZfML 10 (1964), 151-157.
9. P. Vopěnka, Podmodeli modelei teorii mnozhestv (Russian; German Summary) ZfML 10 (1964) 163-172.
10. P. Hájek - A. Sochor, Ein dem Fundierungsaxiom äquivalentes Axiom ZfML 10 (1964), 261-263.
11. P. Vopěnka, Axiome der Theorie endlicher Mengen CPPM 89 (1964), 312-317.
12. \_\_\_\_\_, Nezavisimost kontinuum-gipotezy (Russian; English Summary) CMUC 5 (1964), Supplementum.
13. P. Vopěnka - L. Bukovský, The existence of a PCA-set of cardinality  $\aleph_1$  CMUC 5 (1964), 125-128.
14. P. Hájek, Modelle der Mengenlehre, in denen Mengen gegebener Gestalt existieren ZfML 11 (1965), 103-115.
15. B. Balcar - T. Jech, Modeli teorii mnozhestv obrazovanye sovershennym otnosheniam (Russian; German Summary) CPPM 90 (1965), 413-434.

16. P. Vopěnka, The limits of sheaves and applications on constructions of models, BAPS 13 (1965), 189-192.
17. K. Příkrý, The consistency of the continuum hypothesis for the first measurable cardinal, BAPS 13 (1965), 193-197.
18. P. Hájek, Syntactic models of axiomatic theories, BAPS 13 (1965), 273-278.
19. P. Vopěnka, On  $\nabla$ -model of set theory, BAPS 13 (1965), 267-272.
20. \_\_\_\_\_, Properties of  $\nabla$ -model, BAPS 13 (1965), 441-444.
21. P. Vopěnka - P. Hájek, Permutation submodels of the model  $\nabla$ , BAPS 13 (1965), 611-614.
22. P. Hájek, Eine Bemerkung über standard nichtreguläre Modelle der Mengenlehre, CMUC 6 (1965), 1-6.
23. P. Vopěnka, Concerning a proof of  $\aleph_1 \leq 2^{\aleph_0}$  without axiom of choice, CMUC 6 (1965), 111-113.
- 23a. \_\_\_\_\_, (same title) a correction, CMUC 6 (1965), 337.
24. P. Vopěnka, A. Pultr, Z. Hedrlín, A rigid relation exists on any set, CMUC 6 (1965), 149-155.
25. L. Bukovský, The continuum problem and powers of alephs, CMUC 6 (1965), 181-197.
26. \_\_\_\_\_, The consistency of some theorems concerning Lebesgue measure (preliminary communication), CMUC 6 (1965), 179-180.
27. P. Vopěnka, The first measurable cardinal and the generalized continuum hypothesis, CMUC 6 (1965), 367-370.
28. K. Hrbáček, Model  $\nabla[\omega_\alpha \rightarrow \omega_\beta]$  in which  $\beta$  is a limit number, CMUC 6 (1965), 439-442.

IV-C-4

29. L. Bukovský, An elementary proof of normality of the class of accessible cardinals, CMUC 6 (1965), 409-412.
30. P. Vopěnka, Construction of a model etc. (summary of [5]) in: The theory of models, North. Holl. Publ. Comp. 1965.
31. P. Hájek - P. Vopěnka, Some permutation submodels of the model, BAPS 14 (1966), 1-7.
32. L. Bukovský - K. Příkrý, Some metamathematical properties of measurable cardinals, BAPS 14 (1966), 9-14.
33. P. Vopěnka,  $\nabla$ -models in which the generalized continuum hypothesis does not hold, BAPS 14 (1966), 95-99.
34. L. Bukovský - P. Hájek, On the standardness and regularity of normal syntactic models of the set theory, BAPS 14 (1966), 101-105.
35. P. Vopěnka, A new proof of the Gödel's result on non-provability of consistency, BAPS 14 (1966) 111-116.
36. T. Jech, On ordering of cardinalities, BAPS 14 (1966), 293-296.
37. T. Jech - A. Sochor, On  $\theta$ -model of the set theory, BAPS 14 (1966), 297-303.
38. \_\_\_\_\_, Applications of  $\theta$ -model, BAPS 14 (1966), 351-355.
39. P. Hájek, The consistency of the Church's alternatives, BAPS 14 (1966), 423-430.
40. T. Jech, On cardinals and their successors, BAPS 14 (1966), 533-537.
41. P. Vopěnka - K. Hrbáček, On strongly measurable cardinals, BAPS 14 (1966), 587-591.

42. P. Hájek, Generalized interpretability in terms of models  
(note to a paper of R. Montague), CPM 91 (1966), 587-591.
43. K. Hrbáček, Measurable cardinals in some gödelian set  
theories, CMUC 7 (1966), 343-358.
44. T. Jech, Interdependence of weakened forms of the axiom of  
choice, CMUC 7 (1966), 359-371.
45. L. Bukovský, Consistency theorems connected with some  
combinatorial problems, CMUC 7 (1966), 495-499.
46. P. Vopěnka, The limits of sheaves over extremally disconnected  
compact Hausdorff spaces, BAPS 15 (1967), 1 - .
47. P. Vopěnka - K. Hrbáček, The consistency of some theorems on  
real numbers, BAPS 15 (1967), 107-111.
48. P. Vopěnka - P. Hájek, Concerning the  $\nabla$ -models of set theory,  
BAPS 15 (1967), 113-117.
49. P. Vopěnka, General theory of  $\nabla$ -models, CMUC 8 (1967), 145-170.
50. T. Jech, Non-provability of Souslin's hypothesis, CMUC 8 (1967),  
291-305.
51. K. Hrbáček, A note on generalized Souslin's problem, CMUC 8  
(1967), 307-310.
